Note: Ahrefs data in this report comes from the Ahrefs API pull on 3 July 2026. Live URL QA was run separately against the WordPress post and page sitemaps, with all 304 sitemap URLs returning HTTP 200.

SEARCH CONSOLE SIGNAL

First-party Google data shows continued discovery, more impressions and a stronger average position.

PERIOD	CLICKS	IMPRESSIONS	CTR	AVG POSITION	WHAT IT MEANS
2026-05-18 to 2026-06-16	207	6,371	3.2%	9.7	Week 8 comparison window.
2026-06-02 to 2026-07-01	215	7,386	2.9%	8.6	Latest complete 30-day window available in GSC; impressions are up and average position improved.
2026-06-25 to 2026-07-01	40	1,544	2.6%	9.3	Recent weekly snapshot while the newest content is still early in indexation.
2026-06-01 to 2026-06-30	223	7,372	3.0%	8.6	Full June available data, allowing for normal Search Console lag.

Interpretation: The site is still in the early SEO compounding phase, but the signal remains positive. Impressions rose from **6,371** to **7,386**, clicks moved from **207** to **215**, and average position improved from **9.7** to **8.6**. CTR is slightly lower because Google is testing a much wider set of pages and queries; the next job is turning that discovery into more qualified clicks.

WHAT WE DELIVERED SINCE WEEK 8

44 new posts across assemblies, exam pressure, attendance anxiety, EBSA, neurodiversity, regulation, staff CPD, form-time wellbeing and pupil workshops.

Content Production

- Published 44 additional WordPress posts after the Week 8 report.
- Expanded the site from 160 posts to 204 posts.
- Strengthened clusters around school assemblies, anxiety, exam stress, EBSA, classroom regulation, anti-bullying, parent support and form-time wellbeing.

Technical QA

- Each batch was checked for live HTTP 200 status.
- Recent posts include Article and FAQPage JSON-LD.
- QA checked one-H1 structure, H2 depth, contact CTA, latest feed inclusion, sitemap inclusion and no source or secret markers.

Search Readiness

- All 204 post URLs appear in the native WordPress post sitemap.
- Fresh sitemap submissions were completed after the latest 3 July batch.
- Ahrefs now shows new visibility for bystander behaviour and form-time intent.

TECHNICAL NOTES

CHECK	CURRENT STATUS	ACTION
WordPress post sitemap	204 post URLs live	Use native WordPress sitemap as source of truth.
Live sitemap QA	304/304 URLs return 200	Keep checking after each bulk publish.
Legacy sitemap	67 URLs only	Replace or de-prioritise stale /sitemap.xml route.
Backlink profile	282 live referring domains	Next win is education-relevant authority and conversion, not only more content volume.

NEXT 30 DAYS

1. Indexation & CTR

- Monitor GSC impressions for the newest 44 posts.
- Prioritise pages with high impressions and low CTR, especially anti-bullying and pastoral pages.
- Rewrite titles/metaseo for pages Google is already testing.

2. Internal Links

- Link from workshop/service pages into the strongest educational articles.
- Add related-article paths between anti-bullying, EBSA, wellbeing and form-time clusters.
- Push high-intent readers toward /contact-us/ and workshop enquiry paths.

3. Authority & Conversion

- Use the strongest wellbeing and anti-bullying resources as outreach assets.
- Prioritise relevant education-sector citations and partner links.
- Start tightening page-one discovery pages into clearer lead paths.
