+94 vs Week 5

Read this in plain English: HIP now has a much bigger search footprint than it did at Week 5. We added **39 more posts**, took the live post count from **56 to 95**, and Ahrefs is now seeing early non-brand rankings for **pupil wellbeing** and **define pastoral support**. Search Console is also showing wider discovery, with **3,707 impressions** across May.

KEYWORD	VOLUME	KD	POSITION	TRAFFIC	STATUS	RANKING URL
pupil wellbeing	80	1	10	2	New	/pupil-wellbeing-strategy-schools/
define pastoral support	40	0	7	1	New	/pastoral-support-in-schools/
hip psychology	0	0	1	1	Existing brand ranking	/

Note: Ahrefs API access was available but the account had zero API units left at pull time, so live Ahrefs data was extracted from the logged-in Site Explorer UI instead of the API.

SEARCH CONSOLE SIGNAL

First-party Google data shows much wider discovery across May.

PERIOD	CLICKS	IMPRESSIONS	CTR	AVG POSITION	WHAT IT MEANS
2026-04-16 to 2026-05-15	120	2,001	6.0%	10.4	Week 5 comparison window.
2026-05-01 to 2026-05-30	125	3,707	3.4%	12.6	Impressions are up strongly; clicks are still mostly brand-led while new pages mature.
2026-05-24 to 2026-05-30	32	1,029	3.1%	11.4	Recent weekly snapshot after the largest content pushes.

Interpretation: This is the normal early SEO pattern. Google is testing many more pages, so impressions rise before clicks fully follow. The practical job now is to let the new pages index, improve internal links, and tighten titles/metastats on pages that show impressions but weak CTR.

WHAT WE DELIVERED SINCE WEEK 5

39 new posts across school wellbeing, pastoral care, anxiety, staff support and safeguarding-adjacent topics.

Content Production

- Published 39 additional WordPress posts after the Week 5 report.
- Expanded the site from 56 posts to 95 posts.
- Strengthened clusters around pupil wellbeing, pastoral support, anxiety, emotional regulation, school refusal, trauma-informed practice and nurture provision.

Technical QA

- Each batch was checked for live HTTP 200 status.
- Recent posts include Article and FAQPage JSON-LD.
- QA checked one-H1 structure, H2 depth, contact CTA, latest feed inclusion and WordPress post sitemap inclusion.

Search Readiness

- All 95 post URLs appear in the native WordPress post sitemap.
- Search Console sitemap submissions were completed on 25 May.
- New non-brand Ahrefs rankings now appear for pupil wellbeing and pastoral support intent.

TECHNICAL NOTES

CHECK	CURRENT STATUS	ACTION
WordPress post sitemap	95 post URLs live	Use native WordPress sitemap as source of truth.
Legacy sitemap	67 URLs only	Replace or de-prioritise stale /sitemap.xml route.
Ahrefs crawl	318 OK, 0 5XX	Review the one 404 and one other 4XX when convenient.
Backlink profile	191 live referring domains	Next win is quality/authority, not just more posts.

NEXT 30 DAYS

1. Indexation & CTR

- Monitor GSC impressions for the new 39 posts.
- Find pages with impressions but low CTR.
- Rewrite titles/metatas for the highest-impression opportunities.

2. Internal Links

- Link from service/workshop pages into the strongest educational articles.
- Add related-article blocks between cluster pages.
- Push high-intent readers toward /contact-us/ and school workshop pages.

3. Authority

- Prioritise quality citations and school/education-relevant links.
- Use the strongest articles as outreach assets.
- Do not over-publish before Google has had time to process this batch.
