

BLUE CANVAS AI

# Half-Day AI Consultancy Session

Agenda & Session Plan

Client: Tim Clarke, Quay Group Date: TBC Consultant: **Phil Patterson** Duration: **~4 hours**

09:00

60 min

## Discovery & Current State

Understand how the business operates today — workflows, tools, team structure, and pain points.

- ☐ Walk through a typical recruitment lifecycle end-to-end
- ☐ Map current tech stack (ATS, CRM, spreadsheets, comms tools)
- ☐ Identify top 3 time drains for consultants
- ☐ Understand cross-division workflows and data sharing
- ☐ Discuss client expectations and service level commitments
- ☐ Note any previous tech initiatives — what worked, what didn't

💡 Tip for consultant: Let the client talk 70% of the time here. Listen for the real pain, not the assumed pain.

10:00

15 min

☕ Break

10:15

60 min

## AI Opportunity Mapping

Present tailored AI opportunities based on pre-session research, adjusted for what was learned in Discovery.

- ☐ Walk through the pre-session brief opportunities
- ☐ Show real-world examples and case studies for each
- ☐ Discuss which resonate most with the client
- ☐ Identify any new opportunities surfaced during Discovery
- ☐ Remove or deprioritise anything that doesn't fit

💡 Use screen sharing to show live examples. Tangible > theoretical.

11:15

45 min

## Prioritisation Workshop

Collaboratively rank opportunities using a simple Impact vs Effort framework.

- ☐ Score each opportunity: Impact (1-5) × Ease (1-5)
- ☐ Plot on a 2×2 matrix (Quick Wins / Strategic Bets / Nice-to-Haves / Avoid)
- ☐ Select top 3 priorities for the next 90 days
- ☐ Discuss budget appetite and internal capacity
- ☐ Agree on "do now / do next / do later" buckets

12:00

15 min

☕ Break

12:15

45 min

## Quick Wins — Live Demo

Hands-on demonstration of 2–3 tools the client could implement within weeks.

- ☐ Demo 1: AI CV parsing & candidate matching (e.g., with sample CVs)
- ☐ Demo 2: AI-assisted content/report generation
- ☐ Demo 3: Automated outreach or CRM intelligence (if relevant)
- ☐ Let the client interact — hands on keyboard where possible
- ☐ Discuss costs, setup time, and who would manage each tool

💡 Prepare demos in advance with client-relevant data. Generic demos don't land.

13:00

30 min

## Roadmap & Next Steps

Wrap up with a concrete action plan and clear next steps.

- ☐ Summarise agreed priorities (top 3)
- ☐ Draft 30-60-90 day implementation timeline
- ☐ Outline estimated costs for each initiative
- ☐ Define what Blue Canvas will deliver vs. client-side actions
- ☐ Agree on follow-up cadence and communication
- ☐ Discuss ongoing support / retainer options

## Session Summary

**Total duration:** ~4 hours (inc. breaks)

**Format:** In-person or video call

**Prep required:** Pre-session brief (provided)

**Follow-up:** Written report within 5 working days

## What the Client Receives

### Pre-Session Brief

Company research, AI landscape, and tailored opportunities — sent before the session.

### AI Opportunity Map

Prioritised list of AI applications with impact/effort scoring.

### 90-Day Roadmap

Concrete implementation plan with costs, timelines, and owners.

### Written Report

Full session summary and recommendations, delivered within 5 working days.

## Blue Canvas AI
