Where You Are Today

1

ORGANIC
KEYWORDS

1

MONTHLY
ORGANIC VISITS

7

DOMAIN RATING

41

REFERRING
DOMAINS

The headline: hippsychology.com currently ranks for just 1 keyword ("hip psychology" — your brand name) and receives approximately 1 organic visit per month. The site is essentially invisible to anyone searching for psychology services in your area. This represents a massive untapped opportunity.

What Google Sees Right Now

Metric	Current Value	What It Means
Organic Keywords	1	Only ranking for your brand name — no service keywords
Monthly Organic Traffic	~1 visit	Almost zero discovery through Google search

Domain Rating	7/100	Low authority — needs backlinks and content to grow
Referring Domains	41 (down from 149 all-time)	Decent backlink foundation but many links lost over time
Backlinks	65 (down from 311 all-time)	Link building needed to recover and grow
AI Citations (ChatGPT, Gemini, etc.)	0	Not appearing in any AI search results
Pages Crawled	100 internal URLs	Decent site size — content exists but isn't optimised

Site Health Snapshot

WARNINGS

Good news: Your site health score is 94/100 — this is excellent. The technical foundation is solid. The issues below are fixable and mostly relate to content optimisation rather than structural problems.

Top Issues to Fix

Issue	Count	Impact	Fix
ERROR Image file size too large	19	Slows page load, hurts mobile rankings	Compress images (WebP format)
WARNING Page has links to redirect	91	Wasted crawl budget, slower pages	Update links to final URLs
WARNING Missing alt text	91	Lost image SEO opportunity	Add descriptive alt text to all images

WARNING Meta
description missing or
empty

Keyword Opportunities — Schools & Wellbeing Focus

These are the keywords your target audience is searching for. HIP Psychology's services map directly to these — you just need to show up.

Schools & Education Keywords

Keyword	Monthly Searches	Difficulty	Opportunity
anti bullying week	2,500	Easy (9)	 Massive — seasonal content + workshops
mental health in schools	300	Low (24)	 High — core service keyword
wellbeing in schools	150	Easy (16)	 High — programme landing page
school psychology	70	Medium (30)	 High — authority content
educational psychologist northern ireland	40	Low	 High — local + specialist
emotional support schoolchildren	10-50*	Very Low	 Low competition — easy win
staff training schools wellbeing	20+	Very Low	 Direct service match
pupil attainment wellbeing	10-30*	Very Low	 Research-backed content play
anti bullying programme schools	20+	Very Low	 Workshop/service landing page

resilience training schools

20+

Very Low

🔥 Programme landing page

* Low volume keywords but highly targeted — these searchers are decision-makers (school principals, SENCO, wellbeing leads) with budget to spend.

🧠 Clinical & B2B Keywords

Keyword	Monthly Searches	Difficulty	Opportunity
psychologist near me	6,600	Medium	Medium — competitive but high volume
adhd assessment northern ireland	390	Medium	🔥 High — specialist service
psychology services belfast	320	Low	🔥 High — local keyword
cbt therapy northern ireland	210	Low	🔥 High — service specific
employee wellbeing programme	260	Low	🔥 High — corporate service

Total addressable search volume: 11,000+ monthly searches across schools, clinical, and B2B keywords. The schools keywords are particularly valuable — low competition, high intent, and decision-makers with budget. "Anti bullying week" alone gets 2,500 searches per month at difficulty 9 (very easy to rank for).

🚀 Where You Could Be in 3 Months

📍 TODAY (APRIL 2026)

Organic keywords	1
Monthly organic visits	~1

🎯 JULY 2026 (3 MONTHS)

Organic keywords	30-50+
Monthly organic visits	200-500

Page 1 rankings	0
Blog posts	0
Service pages optimised	0
Google reviews	TBC
AI visibility	0 citations

Page 1 rankings	5-10
Blog posts	12-15
Service pages optimised	8-10
Google reviews	10-15 new
AI visibility	Active citations

What this means in practice: With consistent SEO work over 3 months, HIP Psychology could be receiving 200-500 organic visits per month from people actively searching for psychology services. At typical conversion rates (2-5%), that's 4-25 new enquiries per month — directly from Google, at zero ongoing ad cost.

Recommended SEO Strategy

Month 1: Foundation

- Fix all 19 errors (image compression, redirect links)
- Write unique meta descriptions for all 91 pages missing them
- Add alt text to all 91 images
- Optimise existing service pages with target keywords
- Set up Google Search Console and submit sitemap
- Optimise Google Business Profile
- Publish 4 keyword-targeted blog posts

Month 2: Content & Authority

- Publish 4 more blog posts targeting condition-specific keywords
- Create dedicated service landing pages (CBT, anxiety, ADHD, couples, trauma)
- Begin backlink building (directories, professional associations)
- Google review acquisition campaign
- Weekly Google Business Profile posts

Month 3: Growth & Rankings

- Publish 4 more blog posts targeting long-tail keywords

- Create location-specific pages (Belfast, Derry, NI-wide)
- Press release and local media outreach
- Monitor rankings and double down on what's working
- Build AI visibility through structured content

Your Competitive Advantage

Most psychology practices in Northern Ireland have minimal online presence. The competitors Ahrefs identified for hippsychology.com are generic platforms (LinkedIn, Instagram, Facebook) — not other psychology practices. This means:

The field is wide open. There is very little competition from local psychology practices for SEO. With consistent content and optimisation, HIP Psychology can dominate the local search results for psychology-related keywords in Northern Ireland within 3-6 months.

Your site health score of 94 is already excellent — the technical foundation is strong. What's missing is keyword-targeted content and authority building. That's exactly what we do.
