

White Oaks Connect — Aftercare App

Technical Overview & Cost Estimate

What is White Oaks Connect?

White Oaks Connect is a dedicated mobile app for your residents to stay connected and supported after completing their treatment programme.

Think of it as a digital support network that fits in their pocket. After leaving White Oaks, residents often feel isolated and vulnerable — this app gives them a lifeline back to their recovery community and tools to maintain their progress.

What you and your team would see: A simple web dashboard showing who's checking in regularly, who might be struggling (without invading privacy), and trends across your aftercare community. It's like having a gentle pulse on how your graduates are doing without being intrusive.

Why it matters: Recovery doesn't end at discharge. This app extends your care and support beyond the 30-day programme, helping prevent relapse and keeping people connected to their recovery journey — which ultimately reflects well on White Oaks' long-term success rates.

Staff view: Comprehensive handover tracking and management system

Core Features

- **Daily Check-ins** — Simple wellness tracking with mood, sleep, and stress levels
- **Community Support** — Peer-to-peer encouragement and shared experiences
- **Progress Tracking** — Visual charts showing recovery milestones and achievements
- **Emergency Support** — Direct link to crisis helplines and White Oaks support
- **Appointment Reminders** — Follow-up session scheduling and notifications
- **Educational Content** — Recovery resources and coping strategies
- **Staff Dashboard** — Overview of residents' wellbeing without compromising privacy

Technical Specification

Platform: Progressive Web App (works on iOS, Android, and desktop)

Backend: Node.js with secure cloud database

Security:	End-to-end encryption, GDPR compliant
Integration:	Compatible with existing White Oaks systems
Analytics:	Anonymised reporting and trend analysis
Hosting:	Secure cloud infrastructure with 99.9% uptime

Investment Breakdown

- App Development:** £750
- Consultancy (Phil Patterson's time):** £250
- Total Investment:** £1,000

Includes full development, testing, deployment, and 3 months ongoing support and maintenance.

Implementation Timeline

- Week 1-2:** Requirements gathering and design finalisation
- Week 3-4:** Core app development and testing
- Week 5:** Staff dashboard and admin panel completion
- Week 6:** Integration testing and deployment preparation
- Week 7:** Beta testing with selected residents and staff
- Week 8:** Final adjustments and full launch

Next Steps

To proceed with the White Oaks Connect aftercare app:

1. Review this proposal with your team
2. Schedule a brief consultation call to discuss specific requirements
3. Sign off on the design and feature specifications
4. Begin development phase with regular progress updates

This investment will provide White Oaks with a competitive advantage in aftercare services, demonstrating your commitment to long-term resident wellbeing and potentially improving treatment outcomes.
