

White Oaks Connect — Aftercare App

Technical Overview & Cost Estimate

What is White Oaks Connect?

White Oaks Connect is a dedicated mobile app for your residents to stay connected and supported after completing their treatment programme.

Think of it as a digital support network that fits in their pocket. After leaving White Oaks, residents often feel isolated and vulnerable — this app gives them a lifeline back to their recovery community and tools to maintain their progress.

What you and your team would see: A simple web dashboard showing who's checking in regularly, who might be struggling (without invading privacy), and trends across your aftercare community. It's like having a gentle pulse on how your graduates are doing without being intrusive.

Why it matters: Recovery doesn't end at discharge. This app extends your care and support beyond the 30-day programme, helping prevent relapse and keeping people connected to their recovery journey — which ultimately reflects well on White Oaks' long-term success rates.

Had my first job interview since leaving treatment today. Was nervous but reminded myself that I'm not the same person I was 6 months ago. Didn't get it, but proud I showed up. That's progress, right?

Dr. Sarah (Counsellor)

Absolutely, Emma! Showing up IS the victory. Every interview is practice for the right opportunity.

Michael K.

Yes! The courage to try again is everything. You've got this 🍊

Month 3 clean today. Went for a walk by the lake this morning instead of reaching for my phone when anxiety hit. Small wins adding up to something bigger.

Lisa R.

Those small wins are actually huge! Nature walks saved me in early recovery too

*Staff Dashboard — Overview of residents' wellbeing without compromising privacy*

Core Features

- **Daily Check-ins** — Simple wellness tracking with mood, sleep, and stress levels
- **Community Support** — Peer-to-peer encouragement and shared experiences
- **Progress Tracking** — Visual charts showing recovery milestones and achievements
- **Emergency Support** — Direct link to crisis helplines and White Oaks support
- **Appointment Reminders** — Follow-up session scheduling and notifications
- **Educational Content** — Recovery resources and coping strategies
- **Staff Dashboard** — Overview of residents' wellbeing without compromising privacy

Technical Specification

Platform:	Progressive Web App (works on iOS, Android, and desktop)
Backend:	Node.js with secure cloud database
Security:	End-to-end encryption, GDPR compliant
Integration:	Compatible with existing White Oaks systems
Analytics:	Anonymised reporting and trend analysis
Hosting:	Secure cloud infrastructure with 99.9% uptime

Investment Breakdown

Setup — £1,000 (one-off)

App Development: £750

iOS + Android app, counsellor dashboard, backend infrastructure, app store accounts & submission

Consultancy: £250

Requirements gathering, configuration, ongoing liaison

Monthly — £100

- Hosting and infrastructure
- Push notifications
- Bug fixes and maintenance
- App store compliance updates
- Monthly usage summary

Implementation Timeline

- **Week 1-2:** Requirements gathering and design finalisation
- **Week 3-4:** Core app development and testing
- **Week 5:** Staff dashboard and admin panel completion
- **Week 6:** Integration testing and deployment preparation
- **Week 7:** Beta testing with selected residents and staff
- **Week 8:** Final adjustments and full launch

Next Steps

To proceed with the White Oaks Connect aftercare app:

1. Review this proposal with your team
2. Schedule a brief consultation call to discuss specific requirements
3. Sign off on the design and feature specifications
4. Begin development phase with regular progress updates

This investment will provide White Oaks with a competitive advantage in aftercare services, demonstrating your commitment to long-term resident wellbeing and potentially improving treatment outcomes.
